

Golf Course Supervisor

UNIT 30

Establish planted areas

Overview

The aim of this unit is to provide the learner with the knowledge, understanding and skills to identify and establish planted areas.

	Learner Outcomes		Assessment Criteria
	The learner will:		The learner can:
1	be able to identify a range of plants	1.1	describe how to identify the plants to be established
		1.2	identify a minimum of 80 different plants to be established by common and botanical names
2	be able to establish planted areas	2.1	identify and mark out planting sites accurately
		2.2	check the specification and health of plants before planting and reject unacceptable specimens
		2.3	ensure the quality of plants is maintained throughout handling and planting
		2.4	establish at least 3 different types of plants from: i) trees ii) shrubs iii) container grown iv) root grown
		2.5	provide support and protection to the plants if required
		2.6	ensure the site is left in a tidy and safe condition following operations
		2.7	maintain effective working relations with all relevant people
3	be able to maintain and use relevant equipment	3.1	ensure equipment is prepared, used and maintained in a safe and effective condition

4	be able to promote health and safety and environmental good practice	4.1	work in a way which promotes health and safety, is consistent with relevant legislation, codes of practice and any additional requirements
		4.2	ensure work is carried out in a manner which minimises environmental damage
		4.3	manage and dispose of waste in accordance with legislative requirements and codes of practice
5	know and understand how to establish planted areas	5.1	explain the factors affecting the timing and method of planting
		5.2	describe methods of support and protection and how to apply them
		5.3	explain the initial maintenance requirements for newly established planted areas covering: <ul style="list-style-type: none"> • trees • shrubs • container grown • root grown
		5.4	explain potential problems which may occur and how to deal with these effectively
6	know and understand the principles of selecting plants	6.1	explain the principles of selecting and combining plants for different applications
7	know and understand the methods of assessing plant health	7.1	review the methods of assessing plant health
		7.2	explain the damage which may occur when handling and during the establishment of plants and how to minimise this
8	know and understand the reasons for maintaining equipment	8.1	explain the importance of maintaining equipment
		8.2	describe the methods of maintaining the range of equipment used
9	know and understand relevant health and safety legislation and environmental good practice	9.1	summarise current health and safety legislation, codes of practice and organisational requirements
		9.2	describe the possible environmental damage that could occur and how to respond appropriately

		9.3	explain the correct and appropriate methods for disposing of organic and inorganic waste
		9.4	explain the records required for management and legislative purposes and the importance of maintaining them
